Peter Elliott Architecture + Urban Design is an established architectural and urban design practice having commenced in 1975.

**We have a special interest and expertise in architecture and urban design in the public realm. This includes a diverse range of projects for schools and universities, public authorities and government agencies, particularly within the inner urban context.**

The Practice has a staff of 15 with Peter Elliott as Principal Director, Catherine Duggan and Sean van der Velden as Senior Associates and Geoffrey Barton as Associate.

As Principal, Peter Elliott oversees and directs all projects. In practices of this size it is possible for the Principal to maintain a close working relationship with the client at every stage of the process. Accordingly, this Practice has been able to maintain a high standard of design and delivery of quality contemporary architecture as is acknowledged by numerous architectural awards and published works.

Refer to the Practice webpage for further details: [www.peterelliott.com.au](http://www.peterelliott.com.au)
